### **A Land Of Opportunity**

When it comes to its economy, China's going from strength to strength. It's experiencing rapid growth and is set to soon overtake the USA as the world's largest economic power. Much of its success is due to the thriving manufacturing sector, which accounts for over 40% of China's GDP. As such, it's the world's largest exporter. It's also a popular destination for global businesses to base their manufacturing facilities.

The 'Chinese Dream' initiative is encouraging its citizens to envision and work toward a prosperous and great future. This includes having an increasingly global view and a goal of being a major cultural influence in the world. Now's an ideal time to gain valuable experience in the work and cultural life of a nation that's set to be a major economic player well into the future.
